

The Mindset Mission:

Our mission is to inspire and encourage successful living through the tenets of a Growth Mindset, an Internal Locus of Control, and the 6 Laws of Success.

Anyone Can Develop a Winning Mindset

- Develop a growth mindset with 5 critical beliefs.
- Develop an Internal Locus of Control.
- Master the Six Laws of Success.

Why Mindset Training? Many people are frustrated because they want more for their lives, but the things they want seem out of reach. They're frustrated because their <u>desire for something</u> <u>better is obstructed by limiting beliefs.</u> Our training teaches how to integrate a growth mindset, an Internal locus of control, and The 6 Laws of Success with current, trailblazing science.

How does it work? Through penetrating and relatable stories, Jeff Bennington shares transformational lessons that brought him from aimlessly wandering through life, from hvac installer, to factory worker, to handyman, to journeyman pipefitter, to Founder of The Kindle Book Review, to published author (2016), to Boston Marathon qualifier (2016), to National Top-10 Sales Award winner (2022), to award winning speaker (2023), and now founder of themindsetmission.com. When you combine our mindset training with our 30-Day Mindset Challenge, you will start the process of replacing limiting beliefs and begin creating the life you want!

Who can benefit from our mindset training? Business owners, entrepreneurs, teams, employees, and students—anyone who wants to reach their full potential.

How can your business or organization get mindset training? Contact us at themindsetmission.com

How can businesses support their community with mindset training? When you sponsor a local community training (for a local school or non-profit), your organization gets the training, too! When you sponsor a mindset training event you'll participate in building a better mindset throughout your organization and your community at large—your future employees!

The Mindset Mission was founded in Kokomo, IN - "The City of Firsts"
